

Health Care Is Under Assault in Washington

Support CAEAR Coalition and Double Your Investment in Health Care Access for People Living with HIV/AIDS

The deep cuts to crucial public health programs in the 2011 federal budget are an ominous sign of the challenges ahead. While the Ryan White Program was spared this year due to diligent advocacy, we must build an even stronger presence now to protect the program in the 2012 budget.

At the same time as these cuts are being made to the health care safety-net, House Republicans are talking of replacing the Affordable Care Act, Implementation is moving ahead and under any scenario change is coming.

CAEAR Coalition's efforts in Washington remain sharply focused on increasing funding for the Ryan White Program as we work for implementation of reform that best meets the needs of our community.

Partner with us. For every dollar you donate to CAEAR Coalition, the San Francisco AIDS Foundation will match your contribution dollar for dollar (up to \$25,000 in 2011).
